## PROFILE

---

Experienced full-stack developer seeking new opportunities. Proficient in both front-end and back-end technologies, with a proven track record of creating responsive and user-friendly web applications. Strong expertise in Angular, TypeScript, PHP, and Laravel. Eager to contribute innovative solutions and collaborate in dynamic teams to drive projects to success.

Throughout my career, I have worked in diverse roles, including an American airline, where I gained valuable experience in the transportation sector, and an accounting firm. From these positions, I have contributed to projects varying from e-commerce applications to public services. With a background in different sectors, I have honed my skills in developing solutions from the ground up, capable of serving a high volume of users.

In addition to my technical expertise, I consider myself a team player who values communication and collaboration.

## WORK EXPERIENCE

---

**Breeze Airways - via BairesDev**  
Frontend Developer

**United States (Remote)**  
Nov 2022 – Present

**Summary:** Breeze Airways is a Low-cost US airline, convenient travel, nationwide destinations, simplified flying experience.

Formula: Achievement (metrics if possible) + how? (stack, tools).

- Successfully implemented a new feature in the booking mobile app allowing an automated transition from offline to online and upgrading the rating app from 3.6 to 4.0 in PlayStore.
- Refactored for optimized login, token expiration, and enhanced user experience by using Angular, GraphQL, TypeScript and Ionic
- Created a notification banner with the updating notifications regarding climate changes affecting the passenger journey and flight timings, achieving optimized operations and marketing procedures.
- Increased company revenue through email reminders to passengers, encouraging the addition of extra baggage or flight extras.

*Techstack:* Angular 15, GraphQL, Socket.IO, Typescript

*Additional skills:* Ruby on Rails, Cypress

**GlobalFinances**  
FullStack Developer

**Ecuador (On-Site)**  
October 2019 - Nov 2022

**Summary:** GlobalFinances, an Ecuador-based accounting firm, specializes in simplifying clients' accounting processes through its software solution.

- Served as Tech Lead, guiding a compact team of 3 developers.
- Developed an accounting software from scratch, conceptualizing essential processes to meet required specifications by using Angular, Laravel (PHP), MongoDB, PostgresDB, AWS, Oracle.
- Designed and built a billing module capable of managing over +80,000 monthly invoices.
- Implemented React Context API to handle the global state of the app and leverage React Hooks
- Participated in multiple meetings following the Scrum methodology, aiming to comprehend, enhance, and execute solutions for various Epics, Tasks, and User Stories

*Techstack:* Angular 15, Laravel (PHP), Node, Expressjs, JavaScript, Typescript, Reduxjs, PostgreSQL

*Additional skills:* Socket.IO, Testing Library, Ant Design, Scrum

**VisionXpand**  
Fullstack Developer

**United States (Remote)**  
*April 2018- August 2019*

**Summary:** VisionXpand, a company providing digital hotel management solutions. It highlights services, software modules like Channel Manager and Reservation Engine, a mobile app, and global reach for consulting and support

- Successfully implemented a responsive design approach, ensuring seamless user experience across various devices.
- Enhanced the website's header section, effectively introducing the core offerings of VisionXpand and boosting user engagement through a prominent Call-to-Action.
- Developed and showcased the company's services, including consulting, global visibility, and digital solutions, effectively presenting their value proposition.
- Contributed to the presentation of software modules like Channel Manager and Reservation Engine, utilizing descriptive content and images to convey features to users.
- Engaged users through the contact section by highlighting the company's global reach and exceptional client satisfaction, encouraging potential clients to get in touch

*Techstack:* Laravel (PHP), JavaScript, PostgreSQL, VueJs

*Additional skills:* MongoDB, Unit Testing, Amazon Web Services (AWS)
